## Introduction

Created by industry experts, Aquila delivers mission critical engineering to Europe's nuclear and nuclear medicine industries. Core categories include glovebox technology, shielded facilities, remote handling and transport packages.

Aquila is part of the Calder Group, a \$300m pan-European engineering and manufacturing company with ten operating subsidiaries in five countries. Operating in nuclear, nuclear medicines, defence, aerospace and construction markets, Calder are Europe's largest vertically integrated, lead processing and engineering company.

## Capabilities

The Aquila team has many years of experience in the nuclear industry which includes the specialist areas of containment, shielded systems, remote handling and nuclear packaging. Our engineers have been involved in projects from the design concept stage right through to manufacturing, testing at our factory and installation/commissioning on the clients' sites. Clients engage with Aquila at different stages in the delivery process, but we like to get involved as early as possible so that we can share best industry practice from the start, saving time and money and delivering to our clients' exact requirements.
