Introduction

Darchem Engineering specialises in thermal insulation systems and high grade, high quality stainless steel fabrications where particular expertise in design, manufacture and (where required) installation is required.

Darchem are world leaders in the application of reflective thermal insulation systems to Nuclear Power Plants and provide high quality premium fabrications to the Nuclear, Aerospace, Marine Defence markets.

From the earliest Magnox Stations to the very latest reactors, Darchem Engineering have been involved with the nuclear industry on over 170 sites worldwide during the last 45 years.

Services

Nuclear Markets

- **New Build**
- **PLIM & PLEX**
- **Decommissioning & Waste**
- **Defence**

Capabilities

- **Design**
- **Manufacture**
- **Install**

Products

- **Reflective Metallic Insulation Systems - Darmet**
- **Endothermic Passive Fire Protection Systems – KM1**
- **High grade unique Fabrications – Nickel Alloys, Titanium etc**
- **Stainless Steel Pool Liners**
- **Fuel Storage Racks**
- **Waste Containers – 3m3 Boxes & Drums**
- **Double Walled Pipes, Piping modules**
- **High Integrity Ventilation Ducting**
- **Impact Energy Absorbers for dropped loads**
