## Introduction

IKM Consulting is a multi-disciplinary consultancy with five key disciplines; Engineering, Geo-environmental, Surveying, Building Services and Digital Solutions. Our service portfolio sets us apart, providing a unique blend to our expert skillset. Our roots can be traced back to industrial and commercial projects in Oil & Gas and Petrochemicals and we have expanded into the Energy and Infrastructure Sectors.

## Services

Our range of services include:

### ENGINEERING

Our Engineering team specialise in civil and structural engineering design and consultancy within hazardous and industrial environments.

- Design of safety critical structures
- Design of blast resistant structures
- Structural condition surveys and assessments
- Seismic analysis and design
- Design of structures subject to thermal and impact hazards

### BUILDING SERVICES

Our Building Services team deliver co-ordinated engineering designs using the latest BIM and software technologies.

- FEED
- Safety Case
- Design Modification and Verification
- Optioneering
- Concept, Detailed and Installation Design

### GEO-ENVIRONMENTAL

We pride ourselves on our diverse range of geo-environmental knowledge drawing on a wealth of practical field-based experience. This allows us to offer services including:

- Ecological Appraisal including Phase 1 Habitat Surveys
- Protected Species Surveys
- Contaminated Land Assessment
- Geotechnical Design and Third Party Checks
- Environmental Impact Assessment (EIA)

## **SURVEYING**

Our Surveying team utilise the latest technologies to provide our clients with a reliable and cost-effective surveying solution. Our services include:

- 3D Laser Scanning
- Utility Detection & Service Mapping
- River & Bathymetric Surveys
- Settlement Monitoring
- BIM/3D Modelling

## **DIGITAL SOLUTIONS**

Our award-winning designers have worked on programmes for audiences globally with a portfolio of services that includes:

- Safety Induction Programmes
- 3D Animation
- Explainer Videos
- Virtual Reality and Immersive Technologies
- Scan to 3D Model
