## Introduction

RSM UK provides a range of accountancy and business advisory services to assist you with a full spectrum of advice from compliance to facilitating growth. RSM services include audit and assurance, consulting, outsourcing, restructuring, risk advisory, specialist services, tax services and transactions.

RSM UK recently acquired Outperform Ltd, a Westlakes based management consultancy that helps public and private sector organisations improve their bid, project, programme or portfolio management performance. Our services range from 'light-touch' assessments (e.g. health-checks), through initiating major projects or transformational change (e.g. complexity assessments and assurance), to comprehensive capability building (e.g. designing, developing and embedding methods/frameworks and coaching). Our consultants are recognised as leaders in their fields of expertise. Since the company was formed in 2004, RSM UK has been at the heart of the development of internationally recognised best practice, providing authors for best practice publications such as P3M3, PRINCE2, APM's Body of Knowledge, Co-Directing Change and HM Treasury's Project Initiation Routemap.

## Capabilities

At RSM UK we pride ourselves on our independent approach, developing solutions that are focused on what is best for the client, not limited to a particular service or provider. We actively foster collaborative learning, enabling clients to share ideas and experience with peers across industry through our network of leading industry practitioners - the Outperform Maturity Group.

RSM UK is an Accredited Consulting Organisation (ACO), licensed by Axelos to consult in their Best Management Practice products (PRINCE2®, ITIL®, MoV®, MoP®, MoR®, MSP®, P3M3® and P3O®), and is ISO9001 certified. RSM UK is a corporate member of the Major Projects Association (MPA), the Association for Project Management (APM) and the Best Practice User Group (BPUG).

### **What are the benefits of working with RSM UK Consulting (Outperform) Ltd?**

A true and accurate assessment of capability in bid management, project management, programme management and portfolio management  
Insightful and contextual information and the ability to track improvements through benchmarking maturity scores against the RSM UK database  
An improvement roadmap that is aligned to the organisation's strategic KPIs.

### **What are our differentiators?**

- Thought leadership - access to real insight about best practice guidance from a range of models and frameworks such as APM, APMP, Cabinet Office, HM Treasury
- Expertise combined with industry experience – depth and breadth of knowledge across the team
- Flexible, tailored solutions – adapting methods and frameworks to reflect the specific context of each

organisation, rather than trying to apply a uniform solution

- Practical approach - results-focused solutions based on real-world experience rather than simply applying the text book
