Introduction

VolkerStevin is a civil engineering contractor working throughout the UK in a wide range of sectors with an excellent track record of delivering projects in the most secure and demanding environments.

As part of the one of the largest construction groups in Europe, VolkerWessels, we have access to technical resources and innovations from around the world. In the UK, VolkerStevin collaborates with its sister companies within VolkerWessels UK, drawing on global expertise where needed, to deliver projects across the wider infrastructure market including rail, waste, highways, airport infrastructure, building construction and specialist structural repairs.

Our expertise lies in finding solutions for technical and challenging projects. Each solution and project team is tailor-made for the specific requirements of the project and client.

Services

We provide a range of design and construction services to the nuclear and energy industries including:

- jetty construction
- port and harbour extensions
- flood and coastal defences
- general civil engineering infrastructure
- outfalls
- cooling water intakes
- waste water treatment
- mechanical and electrical installations
- environmental enhancements
- land remediation
- pontoon hire and sales
